# BIOFILTER: A HIGH-PERFORMANCE TRIPLE FILTRATION

Before **dynamizing** city water, it is important to first remove the remaining pollutants. To do this, we offer **high-performance triple filtration** using activated carbon compressed in a fiber that incorporates ionized silver.

The Biofilter, which integrates the **Bio Pro** filtration cartridge, is probably the most efficient and effective large capacity\* activated carbon filter on the market.

\*filtration cartridge valid +/- 1 year (or max 150m<sup>3</sup>) for a family of +/- 5.

**The Biofilter** will remove a large part of the pollutants that would still be present in city water (**i.e. chlorine, bad tastes and odours, pipe corrosion, bacteria, organic pesticides, the PFAS, heavy metals...**) while preserving its trace elements and minerals that are good for our **health**.

The minerals contained in water (mainly calcium and magnesium) contribute between 20% and 50% to the Recommended Nutritional Intake of calcium and magnesium for one person (depending on the mineral content of the water and the age of the people concerned). These minerals have a beneficial role in particular for hypertension, cardiovascular accidents, cancers, fatigue, diabetes, coronary insufficiencies, osteoporosis...
